

Five leading data centre players aim to strengthen relationship among members and offer Inter-Cloud Services within the region

January 10-11, 2012 - Top executives from Asia Data Center Alliance (ADCA) member companies which are TCC Technology from Thailand, 1-Net company from Singapore, CMC Corporation from Vietnam, AIMS Group from Malaysia, and HKCOLO Limited from Malaysia attended the 2012 annual conference which was held at 1-Net company in Singapore. The purpose of this gathering was to exchange, share and update knowledge and experiences on data center among alliance members. Also, members were given a chance to update one another with regards to latest trends of data center and cloud businesses in their countries, presented their visions towards the business trend and discussed the business direction to drive business growth in this region for the year 2012.

The 2012 annual conference of Asia Data Center Alliance (ADCA) could tighten and strengthen the relationship among members which is Asia's leading data center service providers and create a stronger potential as a regional's data center specializing group. Today ADCA is Asia's most solid and strongest data center service provider alliance serving enterprises worldwide.
